The first activity of the day was a bush walk. It was exciting and amazing to see all the interesting things in nature. We saw a snake skin, a wallaby skull, echidna spines, and lots of different plants and fungi. We also saw some bull ants and some big termite nests. We had our lunch and after a yummy piece of chocolate cake that Mrs Green gave us, we had a play. We saw a pretend crocodile in a pond in the garden. There was a big metal lizard on a tree and we got to play in the rock garden. James, Rose and Yarran made a termite’s nest out of sand.

Next we all had a job to do with making damper. It got really hard to stir with the knife, so we had to put in tiny little blobs of water to get it right. Because it was wet we couldn’t cook it in a camp oven so we put it in the ordinary oven. After that we made clay animals. We used leaves, seeds and sticks to help give texture to our animals. We had to wash our hands in a bucket when we finished. Then we had more lunch and the damper with syrup, butter or jam. It was delicious damper just like the recipe said. After the next play, we went back inside to camouflage our bugs that we made. Mrs Green finished the gluing and dropped them back to school the next day.

It was an enjoyable day and we were very tired when we got back to school. We were just in time to hear the bell to go home.
